

THE 22nd AEFSC

FINANCING EUROPE

Investment that Supports Society

18 March 2025 / Brussels

Media Partner

The Conference

The annual “Financing Europe” conference focuses on revitalising Europe’s investment landscape to support societal needs and advance towards becoming the world’s first climate-neutral continent by 2050. The conference aims to foster a collective shift towards sustainable and inclusive economic growth by uniting businesses and governments.

Discussions focus on policy reforms to enhance competitiveness in Europe, significant investments in new technologies, and strategies to ensure Europe remains open yet resilient in the global market.

The annual conference, now in its 22nd year, represents the premier gathering of those working across finance, investment, economics and the path towards a sustainable and competitive European economy.
